

# HELP REDUCE PATIENT CARIES WITH EASY SALIVA TESTING

## Cavity pHighter

Two critical factors contributing to the risk of dental caries are pH level and buffer capacity in saliva. Cavity pHighter strips can quickly and accurately identify both to rapidly indicate a risk of caries. It's so easy to use that you can test in office or send the strips home with a patient to track their risk.

Improving a patients hygiene habits is easy with Cavity pHighter. The mints increase saliva pH and saliva flow, as well as bolster buffer capacity by releasing soluble calcium all to promote healthy tooth enamel.

- Create additional revenue from salivary testing.
- Increase revenue by supplementing individual care plans
- Continued revenue from providing test strips and mints for home use.
- Generate patient engagement and retention

### Test Strips:

Created with dental professionals in mind, Cavity pHighter test strips measure the oral pH balance to determine cavity risk. Mouth bacteria can lead to increased acidity, resulting in dental erosion and painful cavities. Keep your patients' teeth cavity-free by getting ahead of the curve with CAO Group's innovative cavity-detection strips.

Have an acidic mouth? Cavity pHighter Mints are an easy, minty-fresh solution.

### Features:

- Easy-to-use strips
- Quick results
- Includes pH risk guide & acidity level comparison

### Mints:

Created for at-home and professional dental use, Cavity pHighter Mints protect your patients' teeth after they've left your office. CAO's cavity-fighting mints protect your mouth against acid-producing bacteria by reducing acidity and balancing oral pH levels. The result? Decreased risk of cavities and minty-fresh-smelling breath!

Don't know if you are at risk for cavities? Cavity pHighter Test Strips quickly and accurately assess your risk level by testing your mouth pH.

### Features:

- 60 pieces per bottle
- Peppermint flavor for fresh breath
- Cavity protection
- Take one after each meal for optimal efficacy
