EURONDA®

Built to last and be admired

The excellent state-of-the-art technology installed on the E9 Recorder guarantees flawless sterilising of all your instruments, ensuring total safety for you and your patients. Eye-catching design, innovative touch-screen technology and total connectivity combined with quality materials make the E9 Recorder the Autoclave of choice.

For you who love to surround yourself with beautiful things, even when your working.

For you who hate complications.

For you who put safety first before everything else.

For you who love well made things that last over time.

For you who want only the best

On-board integrated traceability system thanks to the adhesive labels printer. The E9 allows you to track the entire sterilisation cycle providing you with all the information required by law at the click of a button. A practical SD card holder, mounted on the side of the E9 Recorder, allows easy transfer of sterilisation data from the autoclave to store on a PC. Total connectivity will enable complete transferability of data from the E9 Recorder to the PC by means of Ethernet or wireless devices.

Eurosonic® 4D - 3D Micro Cleaners

The state of the art ultrasonic cleaners

The Eurosonic® 4D-3D-Micro ultrasonic cleaners provide high performance with ease of use. The operating logic is intuitive and user-friendly, thanks to the backlit controller, which allows you to manage and operate the cleaner with ease. The graphics are clear and neat in line with the Euronda Sterilisation Line.

For those who don't settle for second best

The Eurosonic® 4D is the fully digital and electronic ultrasonic tank with four operating modes calibrated according to the chosen cycle. The stainless steel tank has a 3.5 litre capacity and is equipped with a water drain and valve fitting. The tank lid features a non drip design and is semi transparent. Choose from six preset cycles with time and temperature or free cycles with temperature ranging between 10 and 60° C and a duration of 10 to 40 minutes.
